## TRIM AND FIELD TILE COLOR MATCH

Issued: April 14, 2021

Revision: July 20, 2022

Newpoint™ concrete roof tiles are produced in batch quantities. Although Newpoint™ makes every attempt to keep these batches consistent, there may be times when color variations will occur. This is most prevalent in the times where there may be gaps of time between a color batch run for a given profile, such as between projects or even from neighboring properties. This variation is not a manufacturing defect, as it does not affect the performance of the material, and is not covered by the Westlake Royal Roofing LLC written warranty.
