

Why Roof Tile?

NEVADA CLAY AND CONCRETE ROOF TILE

Locally Made in Nevada

Newpoint™, manufacturer of concrete roof tile, has been serving Nevada home builders, HOA's and homeowners with affordable, attractive and long lasting roofing solutions since 1990. We offer an extensive range of colors and styles to complement any architectural design. Unique profiles include Madera, a cedar shake replacement with a rustic, wood appearance; traditional low profiles Slate and Shake; and Spanish mission barrel.

Most Permanent Roofing Solution

It's easy to see the value of tile when you compare the lifecycle cost of a concrete tile roof to other roofing materials. According to the National Association Home Builders (NAHB) chart, a concrete roof will last 3.75 times longer than an asphalt shingle roof.

Energy Savings

With energy costs increasing over time, tile offers a superior roof that promotes energy efficiency and provides considerable cost savings. The insulating properties of tile help reduce attic temperatures and keep your home warmer in the winter and cooler in the summer, reducing the burden on air conditioning and heating.

Fully Transferrable Warranty

As a brand you can trust, Westlake Royal Roofing Solutions™ offers one of the most comprehensive, fully transferable concrete tile roofing warranty available on the market today.* In comparison, other roofing materials may have prorated, non-transferable warranties that lose value over time.

Fire Tested

All our concrete and clay tile is Class A fire rated, the highest rating possible.

NUMBER OF TIMES A RE-ROOF IS REQUIRED OVER 75 YEAR PERIOD			
ROOFING MATERIALS	CLAY Standard or Lightweight	1 ROOF EVERY 75 YEARS	USTile® Clay Roofing Products
	CONCRETE Standard or Lightweight	1 ROOF EVERY 75 YEARS	NEWPOINT™ CONCRETE ROOF TILE
	ASPHALT	3.75 ROOFS EVERY 75 YEARS	
NUMBER OF ROOFS		1 2 3 4	

Source: 2007 NAHB Study on Life Expectancy of Home Components

Attic temperatures measured using identical heat sources simulating the sun's radiation comparing standard Newpoint™ Concrete Roof Tile to a common asphalt shingle. The result is less heat in the attic and lower energy bills.
