

Westlake Royal™

Roofing Components

A COMPREHENSIVE COLLECTION

A roof is not a mere tile covering but a dynamic, performing system that protects, breathes and ages with the structure. By studying roof performance characteristics and failure points, we have created Roof System Components that, when installed properly and used comprehensively, provide a tile roof that lasts longer and increases energy savings.

- Helps prevent water damage
- Increases airflow and ventilation
- Provides aesthetically pleasing design elements
- Creates a Cool Roof System with selected components

Our Legacy.

Strength

Westlake is an international manufacturer and supplier of petrochemicals, polymers and building products that enhance the people's daily lives. From packaging and healthcare products, infrastructure materials, and building products to automotive and consumer goods, we provide the building blocks for vital solutions.

Building on three decades of prior success in the chemical industry in Asia, T.T. Chao entered North America in 1986 with the acquisition of a single, shutdown polyethylene plant in Lake Charles, Louisiana. Founded as Westlake Chemical Corporation, the company embarked on a mission of sustained growth through further acquisition, expansion of existing facilities and new construction.

Westlake entered building products in 2016 with the acquisition of Axiall, including the Royal Building Products business. In 2021, Westlake doubled the size of its building product portfolio by acquiring Boral North America's roofing; siding, trim and shutters; decorative stone; and windows businesses.

Confidence with Westlake Royal Roofing Solutions™

Westlake Royal Roofing Solutions™ stands behind our roof tiles and components. Many of Westlake Royal™ Roofing Components have long term express limited warranties to give you peace of mind that the product will function properly and last when installed according to the manufacturer's instructions.

Asphalt Shingle
139°
attic temperature

Concrete Tile
94°
attic temperature

Why Tile?

NATURAL PROTECTION

Attic temperatures measured using identical heat sources simulating the sun's radiation comparing Westlake Royal™ Cool Roof System to a common asphalt shingle installation. The result is less heat in the attic and lower energy bills.

Westlake Royal™

Cool Roof System

5 components provide energy efficiency and give substantial return on your investment.

Energy Savings Every Year

22% Reduction in heating and cooling costs[†]

@ For more information, please visit our website WestlakeRoyalRoofing.com

[†]Steep-slope Assembly Testing of Clay and Concrete Tile with and without Cool Pigmented Colors, Oak Ridge National Laboratory, 2005. Results vary based on profile of tile installed, location, weather and other factors.

Westlake Royal™ Roofing Components’ Underlayments

Westlake Royal™ Roofing Components offers a wide selection of underlayments categorized into two main types:

- Self-adhered Underlayments are typically used in severe climates, but can be used in any climate
- Mechanically Fastened (Nail Down) Underlayments are commonly used in moderate climates

Self-adhered underlayments provide two critical advantages over most mechanically fastened underlayments:

- All underlayment fasteners may be protected and sealed under the laps to reduce risk of leaks
- The underlayments self-seal around the fasteners that fix the roofing material (tiles, shingles, slates, metal) to the sheathing or framing

Battens

Westlake Royal™ Roofing Components offers high-performance battens and batten extenders to enhance water flow off the roof for a longer lasting and better performing roof system. Our Elevated Batten System™ battens are a key component of the Cool Roof System.

- Elevated Batten System®
- Batten Extenders

Hip & Ridge

Prevent wind-driven rain, snow and other debris from entering through the hips and ridges with Westlake Royal™ Roofing Components' hip & ridge products. Vented hip & ridge products allow the roof and attic to breathe for improved energy efficiency and longer life span for the entire roof system.

- Figaroll Plus®
- Zephyr Roll®
- Zephyr Block™

Valleys

Valleys collect and channel large volumes of water from two intersecting roofs. Tile roofs require Ribbed Valley Metal to properly channel water off the roof. The ribs help prevent the tiles and debris from clogging the water flow.

- Ribbed Valley Metal

Underlayments

Underlayments are waterproofing membranes used as a secondary layer of protection beneath the roof covering. As a crucial barrier that contributes to the performance and longevity of the roof system, it is important to choose the right underlayment for your climate and roof design.

- Westlake Royal TileSeal™ HT
- Citadel® Plus
- GatorSeal®
- SwiftGuard™
- Westlake Royal™ Ply 40
- Westlake Royal ORG-Ply 40™
- Sol-R-Skin™ BLUE

Eaves

Proper eave treatment by elevating the first course of tile to the proper height contributes to the overall aesthetics of the roof while helping to protect against weather, infestation and burning embers. Vented Eave Risers allow natural intake of air as part of the Cool Roof System.

- Vented Eave Riser

Flashing

Proper flashings help prevent water, snow and debris from entering joints of the roof such as apexes, valley transitions, wall junctions, chimneys, skylights, vents and plumbing pipes.

- Wakaflex®
- Ribbed Tile Pan

Rake & Gable End

As an alternative to rake tiles, Westlake Royal™ Roofing Components offers components that help provide a traditional appearance of slate and shake roofs. They also help to protect against weather, vermin and debris accumulation.

- Gable End Rubber Wedges

When you purchase a product from Westlake Royal™ Roofing Components, you get the entire company backing your hard won business. We provide exceptional service that is ready when you are! Westlake Royal Roofing Solution™ has many products and services to help you grow your business faster than your competition.

Brand Recognition

Westlake Royal Roofing Solutions™’s Newpoint™ Concrete Roof Tile have been the preferred brand throughout the U.S. and we have the awards to prove it - from *Builder Magazine*, *Custom Home Magazine*, *Remodeling Magazine*, *Home Builder Executive*, and *Architectural Record*. Newpoint™ concrete tile was selected as the preferred concrete roof tile product by readers of *Builder and Developer*, *OPTIONS For Today’s Fine Homes*, *50+BUILDER*, *Residential Contractor* and *Green Builder*.

Quality & Testing

Westlake Royal Roofing Solutions™ has studied roof performance and failure points since we started business in the U.S. in 1962. Our experience, knowledge and studies reinforce our conviction that our products are tested, certified and proven to meet the needs and requirements to last in the various climates throughout the country. All our products meet or exceed code requirements in the regions they are offered as well as meet Westlake’s higher standards of quality and sustainability. Our Cool Roof System was voted one of the 100 Best Products by *Professional Builder Magazine* in 2008.

Product – Warranties

Westlake Company is a worldwide building and construction materials business that stands behind all their products, many of which have long term warranties to give you peace of mind that they will perform and last when installed according to the manufacturer’s instructions. When you buy all your products from Westlake Royal Roofing Solutions™, you have a single reliable and high quality provider.

Ease of Use, Save Time

Westlake Royal Roofing Solutions™ is committed to providing products that not only provide the best in quality and durability, but also are safe and easy to install to save time and money. We know time is money. Our products get the job done right the first time.

Eliminate Call Backs

As a professional, when you price your jobs you count on getting the job done right the first time. We offer professional grade products for a complete roof system that can help prevent costly call backs. This can significantly reduce costs of repairs and maintain a superior reputation in the market, which can lead to more referral business.

“Buyers are more informed and educated than they used to be. When they see the difference between tile versus composition shingles, they can see the quality and they want the quality.”

“In the last 12 months, we have had twice as many sales as the guys across the street who have composition shingles on their roofs.”

“Westlake Royal Roofing is a great company. They’ve supported us well, been on time, are a leader in their industry and they’ve got a great product.”

Jim McVaugh
President, McVaugh Custom Homes, Texas

“Using Westlake Royal Roofing Components allows us to give people a better roof, a much more attractive roof and a longer-lasting roof. Your curb appeal is day and night when compared with your run-of-the-mill shingle roof.”

“Our sales outpaced our competitors across the street at a similar price point because of the tile roofs and the curb appeal they offer.”

Carlos Rivero
Café Homes, Florida

Customer Service

When you need help, Westlake Royal Roofing Solutions™ is there. WRRS’s Customer Service is consistently ranked among the highest in the industry. With an average speed of answer time less than 12 seconds and an average handle time of 2 minutes, you can be assured that you will get the answers you need without long waits or getting the runaround.

Westlake Royal Roofing Solutions’s trained Sales Representatives are dedicated to providing the utmost professional sales support for our products. Westlake Royal Roofing Solutions™ also has dedicated Technical Service Representatives to support customer’s technical needs and provide free installation and technical training to anyone who’d like to learn more about efficient and comprehensive tile roof installation.

Technical Support

If you have technical questions or issues, contact our Customer Service department. They may have the answer at their fingertips. If not, they can put you in touch with one of our dedicated full-time Technical Service Representatives to provide you the information you need to properly install a Westlake Royal Roofing Solutions roof product to meet or exceed code requirements.

myWestlakeRoyal - Internet Access 24/7

Our web-based Customer Portal “myWestlakeRoyal” delivers a comprehensive array of online business tools for our customers. Designed to simplify the ordering process and let our customers manage their own accounts, this one-stop resource provides the necessary information quickly. myWestlakeRoyal offers a simple and highly efficient means to place, manage and review product orders in real time.

You earned your spot at the customers’ kitchen table and we want to help you close the deal and get that contract signed.
