

Why Roof Tile?

FLORIDA CONCRETE ROOF TILE

Our Florida Legacy

For more than 60 years Newpoint™ Concrete Roof Tile has proudly served the Florida market with tile manufacturing facilities in Lake Wales and Okeechobee and a stocking yard in Pompano Beach. Newpoint™ is proud to be one of the largest producers of concrete roof tile in the State of Florida.

Local Support

Visit one of our three design centers nearest you to meet with our local Territory Managers and design professionals. They will assist you with samples, color selections and roof system options.

Most Permanent Roofing Solution

It's easy to see the value of tile when you compare the lifecycle cost of a concrete tile roof to other roofing materials. According to the National Association of Home Builders (NAHB) chart, a concrete roof will last 3.75 times longer than an asphalt shingle roof.

Energy Savings

With energy costs increasing over time, tile offers a superior roof that promotes energy efficiency and provides considerable cost savings. The insulating properties of tile help reduce attic temperatures and keep your home warmer in the winter and cooler in the summer, reducing the burden on air conditioning and heating.

Fully Transferrable Warranty*

As a brand you can trust, Westlake Royal Roofing offers one of the most comprehensive, fully transferable concrete tile roofing warranty available on the market today. In comparison, other roofing materials may have prorated, non-transferable warranties that lose value over time.

Curb Appeal

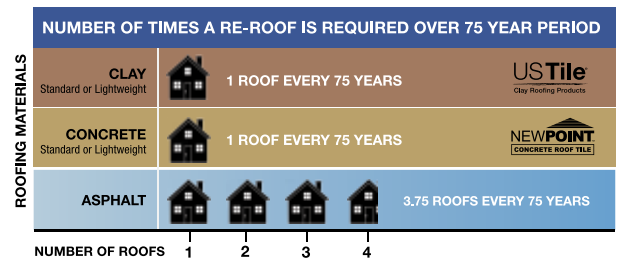

With many shapes and colors to choose from, tile complements a variety of architectural styles that help to build curb appeal and can lead to an increase in home value.

Fire Tested

When installed to design standards, Newpoint™ tile roof systems achieve Class A Fire Rating, the highest rating available. The Class A fire rating includes tests for spread of flame, intermittent flame, and burning brand.

Florida Building Code Approved

In an effort to provide the products and performance needed for the Florida environment, each of our products sold in Florida have been approved for use within the state through either our Florida Product Approvals or our Miami-Dade Notice of Acceptance's. See our Code Approval pages on our website.

Source: 2007 NAHB Study on Life Expectancy of Home Components

Attic temperatures measured using identical heat sources simulating the sun's radiation comparing standard Newpoint™ Concrete Roof Tile to a common asphalt shingle. The result is less heat in the attic and lower energy bills.

FLORIDA CONCRETE ROOF TILE PROFILES AVAILABLE IN MULTIPLE COLORS

*For product warranty details, please visit [Newpoint Concrete Product Warranty](#) on our website. The warranty found there is the sole warranty applicable to Newpoint™ roofing products.
